OUR SERVICES

- ABA (Applied Behavior Analysis): Tailored for children with autism and developmental disorders, ABA focuses on improving behaviors like social skills and academics through structured techniques.
- Occupational Therapy (OT): OT helps children develop daily life skills such as fine motor abilities and sensory processing for regulation through responses to sensory input engagement with their environment.
- Speech Therapy/Feeding Therapy: Speech therapy enhances communication skills, while feeding therapy addresses eating and swallowing difficulties.
- Counseling Services: Emotional and behavioral support is provided to children and teens to develop coping strategies and improve social-emotional skills.

PRICING

Our services empower individuals with special abilities by offering tailored skills, proven strategies, and unwavering support.

We help them overcome challenges, achieve personal aspirations, and thrive in their communities.

Our commitment to accessibility ensures these resources are available to all who need them.

Help Fund Our Therapy Services
